iScanPhotoApp
The family photo organizer for Windows

When a family says goodbye to a home, *the photos come first.*

For funeral directors, estate attorneys, senior move managers and assisted-living staff: a calm, local answer for the families you serve.

WHAT FAMILIES FACE

- Boxes of prints nobody has the time or heart to sort
- Siblings who all want the same albums
- Faces only Mom could name, and she's no longer here to ask
- Prints too precious to mail away to a scanning company

WHAT WE DO

- We scan at the family's home in Kentucky and Indiana: the prints never leave the house
- Faces are grouped and named with the family during the visit
- Every sibling gets the complete collection, on a USB drive or a keepsake copy that opens in any web browser
- Photos arrive dated and organized in iScanPhotoApp, with nothing to upload and no subscription
